EXPERIENCE

J.B. Hunt, Remote/Fayetteville, Arkansas — *Application Development Summer Internship*

June 2020 - August 2020 | June 2021 - August 2021 | (upcoming) June 2022

For my first summer with J.B. Hunt, I worked with a small team of college students to deliver a support ticketing system for their in-house React Native app. I personally designed and built UI, local storage, HTTP requests, and authentication.

For my second summer, I worked with a different small team to transfer web automation from an old system to Microsoft Power Automate. We used Javascript, relational databases, XML, etc. Most valuably, I learned how to overcome roadblocks and frustration, and I learned how to better work within a professional environment.

PROJECTS

https://realgib.com—A personal website to show off my projects.

- Built with React (Next.js), styled-components, TypeScript, and more
- Complete with SEO and Google Analytics
- Hosted on Vercel/Github, URI through Google Domains
- Link: https://realgib.com
